Subject: Objection to planning application LA/01/2024/1187/F

Dear planners

I would like to formally object to planning application LA01/2024/1187/F for the use of an existing waste transfer station to allow storage of mix municipal waste.

I have recently got planning approve to build a house less than 50m from this site. LA01/2023/0417/F.

I thought the landfill site had closed and the council was going to come good on the original condition to turn the ground into a geo park.

My concern is the odour and smell from this change of use will not only affect my enjoyment of my new house but also cause complaints from the nearby caravan park.

Best regards

Colin Mayrs
