1.0 Background

De-rating is a central government policy which reduces the rating burden on a number of sectors, the most notable being manufacturing. The effect of this policy is that less rates are collected than would be expected applying the district and regional rate factors to a property's Net Annual Value (NAV) consequently there is a reduction in the income to Council from rates.

2.0 Detail

As Council has no operational influence in the application any such policy De-Rating grant is a statutory mechanism through which central government compensates the local Councils for any loss incurred as a result of the central policy. The grant is linked to the NAV's of those non-domestic properties where de-rating applies and is therefore affected by any increase in the District Rate factor as set by Council annually.

2.1 Quarterly Analysis

Land and Property services have provided us with the third quarterly projection for de-rating grant for 2025/26. This indicates a positive forecast of approximately £60k (Qtr2 - £59k positive). The tables in the Appendix A to this report show some analysis of the de-rating grant for all Councils.

ACTUAL PENNY PRODUCT (APP) DATA

The audited APP data shown in the final box is the basis for the finalisation (settlement) of the de-rating grant. The quarterly APP data is provided to assist councils' monitoring of this grant during the year. The APP data cannot be broken down into the de-rated categories as the APP data is calculated on projected monetary values which include case settlements etc.

NB: The finalisation (settlement) is the difference between the de-rating grant paid during the year (calculated by multiplying the council's non-domestic district rate by the de-rated EPP used by the council in the rate setting process) and the Year End De-rating Grant (calculated by multiplying the council's non-domestic district rate by the audited APP). A negative number indicates clawback of De-rating Grant with a positive number resulting in additional De-rating Grant to that council in the subsequent financial year.

ESTIMATED PENNY PRODUCT (EPP) DATA for DE-RATING GRANT

The following additional data provides a quarterly overview of EPP data totals which is then further broken down for each de-rated category. This data is based on net annual valuations (NAV). The EPP has been derived by dividing the NAV data, provided by LPS, by 100 and multiplying by the percentage relevant for that category (as shown in category headings). As mentioned above the APP data cannot be directly correlated as APP figures are based on monetary values whereas NAV/EPP data is taken from the valuation list at a point in time.
