8.15 Some residents stated in their objections that they do not give consent to the support structures being placed on their land, this has now been resolved and these objections have been withdrawn. The landowners have now submitted letters of support to the application. One letter suggested that there would be a requirement for the addition of red lights on top of the towers as they were comparable in height to wind turbines. Red lights are not proposed nor required and the towers proposed are at a maximum 20m whereas a modest wind turbine would be 45m, and a large one 120m, therefore this proposal is not comparable.
